

WHAT IS CLAIMED IS:

1. A method of processing composite waste including combustibles and incombustibles, comprising:

a press process for pressing the composite waste; and

5 a dry distillation process for performing dry distillation on the pressed composite waste.

2. The method as claimed in claim 1, further comprising a shredding process for shredding the composite waste that has been pressed and has undergone dry
10 distillation; and a separating process for separating the shredded composite waste into combustible carbide and incombustibles.

3. The method as claimed in claim 2, wherein the shredding process is divided into two steps comprising a
15 first step in which a coarse shredding is performed and a second step in which a fine shredding is performed.

4. The method as claimed in claim 1, wherein the composite waste is a body of a car, seats and ornamental materials inside the car.

20 5. The method as claimed in claim 1, wherein the composite waste is a body a car, seats and ornamental materials inside the car, the pressed composite waste being formed in a rectangular parallelepiped shape.
